more expertise

Successfully completing the Achilles programme and achieving the accreditation reiterates our dedication to providing quality products, services, compliance and commitment to our customers increasing demands regarding health and safety, environmental and corporate governance.

We are the largest distributor of Dexion in the UK. Our planning and installation teams are recognised as experts in the industry.

"HIGHLY COMMENDED"
QUALITY ASSURANCE SCHEME AUDIT 2014

As a SEMA distributor company we work to the latest industry standards and codes of practice. We are one of a handful of companies in the UK able to offer independent SEMA approved pallet rack inspections.

Prince's Trust

At CSI we are proud to support The Prince's Trust in their great efforts to support young people into work and training. To help raise funds we donate £1 for every order placed on our website.

As a BSI member we have achieved ISO9001 for over 10 Years.

csigroup.info

One supplier supporting your workplace through its whole lifecycle:
Design, Installation, Product Supply, Spares & Repairs and Re-design.

CSI is the workplace product and solutions provider that gives you more.

*We offer our customers **more for** their workplace so they can get **more from** their workplace.*

CSI has been built on the 35 year reputation of trading as ESE, one of the largest industrial storage companies in the UK. Our e-commerce division has transformed our brand into a “more” company for industrial and commercial products and solutions.

We offer a supportive working dynamic - Whatever it is that you are in the business to do, we're in business to help you do it.

more for you

- » The best products and solutions at the best prices.
- » Delivering efficiency, safety and return on investment.
- » 15,000 Products online designed for the industrial and commercial workplace.
- » Combined expertise and experience of our solutions and products teams.
- » Customer service, before, during and after sales.
- » Help to unlock, realise and release the potential within your workplace.

there's more to every workplace

Storage solutions for Automotive Workshops

Automotive Workshops need to hold a wide range of spare parts which are easily accessible and safely stored so they can be easily retrieved when work starts on a vehicle.

Balancing the need for sufficient capacity for storing spare parts, against providing adequate space to carry out repairs can be difficult. The storage area must be fully optimised and tailored to suit your operation and layout of your building. Our wide choice of solutions can help you exploit the available space to the fullest, providing optimum storage for your operation.

- ✓ Storage for all your awkward and odd shaped parts
- ✓ Dense storage solutions for a wide variety of articles
- ✓ Multi-tier storage available to maximise the height of your building
- ✓ Secure and efficient storage for all your tools

Shelving - For all your small parts

HI280 shelving system is ideal for the storage of small items used in an Automotive Workshop. It is easily adapted for awkward parts such as panels or bumpers which require unique storage solutions. The robust HI280 shelving range has a vast assortment of accessories to specifically meet the demands of the Automotive sector. This enables us to provide a tailored storage solution with high space utilization, full accessibility and a good working environment.

Picture 1

By mounting HI280 shelving on mobile bases your workshop can make the best use of space with a compact storage system.

Picture 2

HI280 Multi-tier shelving system with access stairs can maximise your storage potential by exploiting the height of your building.

Picture 3

Our HI280 shelving standard finish is galvanised, however, special painted colours are available to reflect your corporate branding, upon request.

Picture 4

Specially designed accessories can help to store unique items such as windscreens.

Alternative solution for spare parts & tools storage

Every workshop needs a good solution for storing their spare parts. A storage machine offers an alternative solution for this and can increase component picking by up to 60% in a reduced floor space of up to 70%.

Automotive tools can be specialised and costly, so ensuring these are safely stored and easily located is essential. Our storage machines offer fast and secure access reducing lost time spent searching for the correct tool and providing a damage free storage environment.

- ✓ Dense storage for spare parts
- ✓ Store your tools in a central and easily accessible location
- ✓ Easy retrieval and return process for costly workshop tools
- ✓ Improve security with the potential to offer restricted access

Tornado storage machines have been successfully installed in a Mercedes Service Centre to store their Automotive van components. This has seen improvements on their stock accuracy and speed of picking, on a reduced footprint.

Audi's largest sales and service unit in Sweden has their tools stored in a Tornado machine. The system keeps the tools in good order and the space saved has allowed the creation of an additional servicing point.

Efficient tyre storage

The HI280 tyre racking system is ideal for manual handling operations and can also be mounted on mobile bases if floor space is limited.

Offering seasonal tyre storage can expand your workshop's service range and could create additional revenue for your business.

- ✓ Easy manual handling
- ✓ Maintains the quality of the tyre
- ✓ A dense storage solution for tyres
- ✓ Available on mobile bases to optimise space
- ✓ Galvanised for durability

More information see:

Automotive accessories for increased efficiency

Bay divider

For vertical storage of long goods, like exhausts/rods.

S-hook

Used for storage of exhaust pipes.

Tube rail

For hanging storage of e.g. car mats.

Plastic bins

Suitable for storage of small items

Sloping shelf with front stop

Can be equipped with plastic bins to facilitate LEAN picking

Display panels

Used to provide a good overview of the visible parts.

Loop divider

Storage of windscreens or bulky parts such as hoods, doors, etc.

Shelf divider

Used to separate stored items and create smaller shelf locations.

Exhaust pipe support

Used for storage of exhaust pipes.

pallet rack inspections

Regular rack inspections help to minimise the number and severity of warehouse accidents. Our rack inspectors offer a comprehensive, convenient and cost effective way to keep your warehouse safe and compliant with Health & Safety regulations.

Over the year, moving goods, modifying the configuration and general knocks through daily use can cause changes in the capacity of your racking and potentially lead to accidents - a risk to both man and material.

Qualified Inspectors can spot these changes early and help eliminate and reduce future costs.

Our SEMA Approved Rack Inspectors carry out comprehensive annual inspections. Providing you with detailed reports offering professional advice and highlighting areas that require attention, immediately or in the near future, through an easy to understand traffic light scoring system.

Inspections comply with all government legislation and industry guidelines.

Our rack inspectors are **SEMA**
(Storage Equipment Manufacturers Association)
approved and hold the **SARI** certificate

- » Comprehensive professional inspection by SEMA Approved Rack Inspectors (SARI)
- » Experienced Inspectors certified to SEMA standards
- » Independent expert to assess your equipment
- » Detailed inspection report
- » No interruption to operations
- » Early risk discovery minimises future repair costs
- » Prevention of damage to people or goods
- » Extending lifespan of facilities

To arrange an inspection
CALL US NOW ON 01506 413 313
or visit us at **csigroup.info/racksafety**

Annual Inspections

No need to remember when your next inspection is due, our rack inspection team will contact you to remind you when you next need an inspection carried out.

**DAMAGED UPRIGHTS PROVIDE
HAZARDOUS CONDITIONS**

**FAILURE TO INSPECT CAN LEAD TO A
RACK COLLAPSE**

**RACKS AT ALL HEIGHTS
NEED TO BE INSPECTED**

INCLINATION

Maximum inclinations for both empty and fully loaded racks should not be exceeded.

LOAD WEIGHT & PLACEMENT

The weight of the load must not exceed max weight capacity or be misplaced.

DEFORMATION

Even slightly bent beams and uprights can be a sign of potential danger. Beams and uprights must always be replaced.

We are a **SEMA DISTRIBUTOR COMPANY** and were delighted to be awarded the *Highly Commended status* in our latest audit.

"The SEMA Distributor Company (SDC) qualification indicates that the company is dedicated to the supply of quality storage equipment. To become part of the SEMA Distributor Group (SDG) the company must demonstrate a high level of commitment to safety standards, work to industry codes of practice and be regulated by a random audit"

Legislation

Maintaining rack safety is not simply an important warehouse practice: it is a legal obligation.

Under the **Workplace (Health, Safety and Welfare) Regulations of 1992** and the **Provision and Use of Work Equipment Regulations (PUWER) of 1998**, employers are legally required to inspect their work equipment, including all pallet racking.

This means that any business with even as little as one bay of racking is required to carry out regular SEMA-approved examinations.

Racking should be inspected on a regular basis and should be carried out in accordance with SEMA Guidelines No.6 - Guide to the Conduct of Pallet Racking and Shelving Surveys.

The frequency of inspections depends on a wide variety of factors that are particular to the site, however the first inspection should be carried out within 6 months of the installation becoming operational and thereafter at a maximum of 12-month intervals. Records of these inspections must be maintained.

LEGISLATION

HEALTH & SAFETY AT WORK ACT 1974

- » **Section 2:** Duties of the Employer
- » **Section 7 & 8:** Duties of Employees

MANAGEMENT OF HEALTH & SAFETY AT WORK REGULATIONS 1999

- » **Regulation 3:** Risk Assessment
- » **Regulation 11:** Capabilities and Training

PROVISION AND USE OF WORK EQUIPMENT REGULATIONS 1998 (PUWER)

- » **Regulation 5:** Maintenance
- » **Regulation 6:** Inspection
- » **Regulation 22:** Maintenance Operations
